BIOGRAPHY

Lady Saint - Canadian born, raised in Fort McMurray Alberta, now calls Edmonton Alberta (#YEG) her home. Saint is a mastermind with her creative writing abilities and vocal delivery. She is mindful to ensure that people of all backgrounds and ages can enjoy her thought provoking music. Being a female in a male dominated genre, Lady Saint's individualism and versatility keeps her one step above the rest. Her audiences are captivated by her word play and sincerity in her music.

Saint began her journey in 2015, writing poetry followed up with a life changing showcase in New York (which kick started her foray into the world of performing). She has an authentic flow and she continues to educate herself with each experience, adding it to her repertoire of stories that can be told. She keeps her Polynesian heritage extremely close to her heart, which is what keeps her so incredibly grounded, humble and is at the core of everything she does.

Having the recent opportunity to write and perform an original track in the opening ceremonies for the Alberta Winter Games 2018, expanded her footing in the music industry. She continues to expand her reach worldwide, working with artists and producers from every corner of the globe, sharing her roots, culture and her vibe - which truly transcend the generations.
